

A nighttime photograph of a cityscape, likely Stockholm, featuring a large bridge with traffic light trails. The sky is dark blue, and the city lights are visible. A prominent church spire is visible in the background. The bridge has multiple lanes of traffic, and the light trails suggest a long exposure. The overall scene is illuminated by streetlights and city lights, creating a vibrant urban atmosphere.

Interim Report

January–September 2019

STOCKHOLM 23 OCTOBER 2019

Interim Report January–September 2019

The quarter in brief

- Solid financial performance despite seasonal slowdown and softer macroeconomic environment
- Broad-based demand for advisory services, lending and capital market financing
- Swedish mortgage net sales in line with SEB's market share

Summary

SEK m	Q3			Q2		Q3		Jan–Sep			Full year

President's comment

In the third quarter, leading economic indicators pointed to further slowdown in global economic growth. With inflation at low levels, central banks responded to downside growth risks by lowering interest rates and continued quantitative easing.

The Federal Reserve cut rates twice, to 2.0 per cent, in 2019. In the third quarter the European Central Bank cut the deposit rate by 10 basis points to negative 0.50 per cent and resumed its asset purchase programme, driving the 10-year German government bond yield to a record-low level. As interest rates have fallen, the amount of negative-yielding debt soared to around USD 17 trillion, corresponding to nearly 30 per cent of all bonds outstanding. This negative-yield environment is a challenge for the financial industry, particularly for life and pension insurance companies, as pension liabilities increase as discount rates fall. In contrast, the accommodative monetary policy actions gave continued support to equity and other asset prices during the quarter. The Swedish krona depreciated by 1.6 and 5.8 percentage points, respectively versus the euro and US dollar, during the quarter.

Solid financial performance in an uncertain market

Despite a softening macroeconomic environment and a seasonal slowdown, clients remained active in the third quarter and we continued to execute on our strategic focus areas: advisory leadership, operational excellence and extended presence.

In the division Large Corporates & Financial Institutions, income generated from advisory services as well as bank and capital markets financing resulted in a year-on-year increase in operating income of 7 per cent. SEB's custody business experienced strong inflows of assets – SEK 563bn in the third quarter – which was particularly rewarding as this has been one of the top investment areas for SEB over the last years. In the short term, the pipeline for lending and investment banking activity continues to look promising. However, SEB recognises that the macroeconomic outlook has continued to weaken.

The division Corporate & Private Customers experienced another quarter with strong financial performance and SEB's ranking in external customer satisfaction surveys improved. Lending growth remained strong and SEB continued to grow its market share within corporate and mortgage lending, while margins on new sales remained stable. Assets under management increased by SEK 11bn in the third quarter.

Within the Life division, margin pressure on insurance and pension services continued. Thus, cross-selling and process automation remain key for profitability and economies of scale to be maintained. In the Investment Management division, financial performance was primarily driven by higher market values, while net inflows of assets under management were muted. In the Baltics, demand for financial services remained high, but SEB maintained its balanced growth path in line with strategy.

To sum up, our diversified business model remains favourable. The operating profit before items affecting comparability increased by 5 per cent compared with the same period last year, while return on equity reached 13.2 per cent. Asset quality was high with net expected credit losses at 0.08 per cent. SEB reported a capital buffer of 170 basis points above regulatory requirements. The buffer remains in line with our target, aiming to ensure that we have the financial strength needed to support our customers going forward.

Responding to changing customer behaviour

The long-term trend of our customers going more digital continues, with the mobile app being the preferred channel in SEB. Today, mobile interactions represent more than 80 per cent of all customer interactions in SEB in Sweden and we continue to see increasing activity in both the private and corporate segments. As a response to our customers' behaviour, we continue to execute on our transformation agenda, focusing on connectivity, automation and analytics in order to enhance efficiency, reduce risk and improve customer experience. Innovation is also an important part of our transformation agenda and during the third quarter, SEBx – which is our independent innovation venture – entered into a partnership with the fintech company, Thought Machine, to use its cloud-based core banking engine as part of its technology platform.

Similar to digitalisation, sustainability continues to grow as a theme among customers, investors and regulators. Sustainability has been an integrated part of SEB's business for many years and we continue to develop sustainable products and services. We recognise that climate change is a global challenge in need of international collaboration. In the third quarter, SEB was therefore one of 131 banks globally to sign the UNEP FI Principles for Responsible Banking. By committing to these principles, SEB is contributing to the establishment of an industry-wide strategic framework aiming to increase banks' positive impact on environment and society.

The first nine months

Operating profit before items affecting comparability increased by SEK 820m, 5 per cent, and amounted to SEK 17,831m (17,011). There were no *items affecting comparability* in the first nine months 2019, but in 2018 such items amounted to SEK 4,506m (see note 6). *Net profit* amounted to SEK 14,346m (18,558).

Operating income

Total operating income increased by SEK 1,922m, 6 per cent, compared with the first nine months 2018 and amounted to SEK 36,045m (34,123).

Net interest income amounted to SEK 17,020m, which represented an increase of 8 per cent year-on-year (15,807).

SEK m	Jan-Sep		Change %
	2019	2018	
Customer-driven NII	18 902	17 314	9
NII from other activities	-1 882	-1 507	25
Total	17 020	15 807	8

Customer-driven net interest income includes the net interest income derived from loans to and deposits from the public and also reflects an internal funding pricing element. Customer-driven net interest income increased by SEK 1,588m year-on-year. There was a positive lending volume effect, which however was offset by the negative lending margin development. The Swedish repo rate increased in the beginning of the year and the compensation to the divisions for deposits from treasury was higher. In all, this led to a positive deposit margin effect.

Net interest income from other activities (including for instance funding and other treasury activities, trading and regulatory fees) was SEK 375m lower year-on-year. One explanatory factor was treasury's internal compensation for deposits. Applying IFRS 16, the new accounting rules for leases, increased interest expense by SEK 70m. Regulatory fees, for both resolution funds and deposit guarantees, were SEK 264m lower year-on-year and amounted to SEK 1,607m (1,871). In 2019, the resolution fund fee was reduced to 0.09 per cent from 0.125 for 2018 (see page 10).

Net fee and commission income was slightly higher than the first nine months 2018 and amounted to SEK 13,719m (13,517).

The mergers and acquisitions activities were fairly high throughout the year. Compared with the first nine months 2018, gross fees from the issuance of securities and advisory services increased by SEK 240m. Gross fee income from

custody and mutual funds, excluding performance fees, decreased by SEK 299m year-on-year (see note 3). Customers' new investments were primarily made in products with lower margins. Performance fees increased by SEK 37m compared with the first nine months of 2018. Net payment and card fees increased by 5 per cent year-on-year to SEK 3,016m (2,880). Gross lending fees increased by SEK 245m year-on-year as loan volumes increased. The net life insurance commissions related to the unit-linked insurance business decreased by SEK 99m year-on-year. The decrease was partly due to the divestment of SEB Pension in 2018 (see note 6).

Net financial income increased by 5 per cent to SEK 4,795m (4,567).

Both companies and financial institutions were active in managing their risks and investment portfolios especially in the earlier part of the year when market volatility was higher. There were also positive market valuation effects. The effect in the fair value credit adjustment¹⁾ was negative and amounted to SEK -268m (38). Other life insurance income, net, decreased by SEK 364m to SEK 503m year-on-year, primarily due to the divestment of SEB Pension (see note 6). There was also a decrease in income from traditional insurance due to lower long-term interest rates.

Net other income increased to SEK 510m (233). Realised capital gains as well as unrealised valuation and hedge accounting effects were included in this line item.

Operating expenses

Total operating expenses increased by 3 per cent to 16,918m (16,379).

Staff costs increased by 2 per cent due to the strategic initiatives, salary inflation and accruals for variable long-term remuneration. The average number of full-time equivalents increased to 14,909 (14,751 for the full-year 2018). IFRS 16 effects decreased other expenses and increased depreciation costs. Ordinary supervisory fees amounted to SEK 114m (118).

The cost target in the business plan for 2019-2021 is described on page 10. Operating expenses related to the strategic initiatives increased according to plan.

Net expected credit losses

Net expected credit losses remained low and amounted to SEK 1,297m (753). Asset quality was high and the net expected credit loss level was continued low at 8 basis points (5).

Items affecting comparability

There were no *items affecting comparability* in the first nine months of 2019. In the corresponding period 2018, items affecting comparability amounted to SEK 4,506m (see note 6).

Comparative numbers (in parenthesis throughout the report):

The result for the first nine months 2019 are compared with the first nine months 2018.

The result for the third quarter 2019 is compared with the second quarter 2019.

Business segments comparisons year-to-date 2019 are made to year-to-date 2018.

Business volumes are compared with year-end 2018, unless otherwise stated.

¹⁾ Unrealised valuation change from counterparty risk (CVA) and own credit risk standing in derivatives (DVA). Own credit risk for issued securities (OCA) is reflected in Other comprehensive income.

Income tax expense

Income tax expense amounted to SEK 3,486m (2,959) with an effective tax rate of 20 per cent (14).

As per 1 January 2019, the Swedish corporate tax rate decreased from 22 to 21.4 per cent, which had a small effect on SEB's effective tax rate. The effective tax rate was also affected by certain small tax-exempt income.

Return on equity

Return on equity for the first nine months of 2019 was 13.1 per cent (17.7). Excluding items affecting comparability return on equity for the first nine months 2019 was 13.2 per cent (13.6).

Other comprehensive income

Other comprehensive income amounted to SEK -2,200m (1,407).

The value of SEB's pension plan assets exceeded the defined benefit obligations to the employees. The discount rate used for the pension obligation in Sweden was 0.75 per cent (2.0 at year-end 2018) which increased the pension obligation substantially. The value of the pension assets increased but the *net value* of the defined benefit pension plan decreased which affected other comprehensive income by SEK -2,334m (1,252).

The net effect from the valuation of balance sheet items that may subsequently be reclassified to the income statement, i.e. cash flow hedges and translation of foreign operations amounted to SEK 184m (72).

The third quarter

Operating profit was seasonally lower in the third quarter and decreased by SEK 239m, 4 per cent, to SEK 5,864m (6,103). *Net profit* amounted to SEK 4,772m (4,892). Compared with the third quarter 2018, the *operating profit* improved by 5 per cent.

Operating income

Total operating income decreased by SEK 255m, 2 per cent, compared with the second quarter 2019 and amounted to SEK 11,942m (12,197). Operating income increased by 4 per cent compared with the third quarter 2018.

Net interest income amounted to SEK 5,983m, which represented an increase of 5 per cent compared with the second quarter (5,692) and an increase by 12 per cent year-on-year.

	Q3	Q2	Q3
SEK m	2019	2019	2018
Customer-driven NII	6 298	6 238	6 041
NII from other activities	-315	-546	-722
Total	5 983	5 692	5 319

Customer-driven net interest income increased by SEK 60m compared with the second quarter 2019. A positive lending volume effect was partially offset by a negative lending margin development. Deposit margins decreased, primarily driven by lower compensation for deposits from treasury in the third quarter.

There was an opposite effect in net interest income from other activities, i.e. treasury. Other short-term effects, related to Markets operations, contributed positively to net interest income. Regulatory fees, including both resolution fund and deposit guarantee fees, were SEK 38m higher than the second quarter and amounted to SEK 581m (542). Both fee types were affected by risk adjustments. In total, net interest income from other activities improved by SEK 231m compared with the second quarter 2019.

Net fee and commission income decreased by 1 per cent from the second quarter and amounted to SEK 4,693m (4,735). Year-on-year, net fee and commission income increased by 4 per cent.

Gross fees from the issuance of securities and advisory services increased by SEK 42m in the third quarter and almost doubled year-on-year. Gross fee income from custody and mutual funds, excluding performance fees, increased by SEK 47m in the third quarter, driven by improved equity markets. Performance fees decreased by SEK 45m in the third quarter, however, due to seasonality. Net payment and card fees decreased by 4 per cent in the third quarter when customer activity was seasonally lower. Gross lending fees decreased by SEK 50m in the third quarter but increased by SEK 110m year-on-year. The net life insurance commissions related to the unit-linked insurance business increased by 2 per cent compared with the second quarter 2019.

Net financial income decreased by 19 per cent to SEK 1,196m (1,482) and decreased by 21 per cent year-on-year.

The fair value credit adjustment¹⁾ amounted to SEK -160m versus -102m in the second quarter. Other life insurance income, net, dropped by 25 per cent quarter on quarter, to SEK 150m and by 22 per cent compared with the third quarter 2018. Traditional insurance was challenged in the current interest rate environment.

Net other income decreased by 76 per cent to SEK 70m (287). Realised capital gains as well as unrealised valuation and hedge accounting effects were included in this line item.

Operating expenses

Total operating expenses decreased by 2 per cent to SEK 5,589m (5,708). Compared with the third quarter 2018, operating expenses increased by 3 per cent.

Staff costs levelled out and remained on the same level as the second quarter. Other expenses decreased by 4 per cent mainly due to seasonal effects. Ordinary supervisory fees amounted to SEK 33m (41).

Net expected credit losses

Net expected credit losses remained low and amounted to SEK 489m (386). Asset quality was high and the net expected credit loss level was continued low at 9 basis points (7).

Items affecting comparability

There were no *items affecting comparability* in the third quarter 2019.

Income tax expense

Income tax expense amounted to SEK 1,092m (1,211) with an effective tax rate of 19 per cent (20).

Return on equity

Return on equity for the third quarter 2019 decreased to 13.2 per cent (13.9).

Other comprehensive income

Other comprehensive income amounted to SEK -1,511m (-237).

The value of SEB's pension plan assets exceeded the defined benefit obligations to the employees. The discount rate used for the pension obligation in Sweden was 0.75 per cent (1.2 at 30 June) and the pension obligation increased. The net value of the defined benefit pension plan assets and liabilities decreased which affected other comprehensive income by SEK -1,473m (-265).

The net effect from the valuation of balance sheet items that may subsequently be reclassified to the income statement, i.e. cash flow hedges and translation of foreign operations amounted to SEK -80m (101).

Business volumes

Total assets at 30 September 2019 amounted to SEK 3,046bn, representing an increase of SEK 478bn since year-end (2,568).

Loans

SEK bn	30 Sep	31 Dec	30 Sep
	2019	2018	2018
General governments	17	19	24
Financial corporations	79	68	76
Non-financial corporations	882	806	808
Households	622	598	592
Collateral margin	58	56	48
Reverse repos	201	98	116
Loans to the public	1 859	1 645	1 664

Loans to the public increased by SEK 214bn since year-end 2018 and amounted to SEK 1,859bn (1,645). Loans to non-financial corporations increased by SEK 76bn and household lending increased by SEK 24bn. While reverse repos (contractual agreements to buy and subsequently sell back securities) increased significantly, these volumes are generally short-term in nature.

SEB measures and monitors its credit risk exposure in the credit portfolio, which includes loans, contingencies and derivatives. More information about the credit portfolio is available on page 8.

Deposits and borrowings

SEK bn	30 Sep	31 Dec	30 Sep
	2019	2018	2018
General governments	40	27	27
Financial corporations	226	226	334
Non-financial corporations	503	461	447
Households	344	323	318
Collateral margin	55	49	53
Repos	28	3	14
Registered bonds	10	21	24
Deposits and borrowings from the public	1 206	1 111	1 216

Deposits and borrowings from the public increased by SEK 95bn to SEK 1,206bn (1,111). Deposits from non-financial corporations and households increased by SEK 63bn in 2019, from a low level at year-end. Repos, which are generally short-term in nature, increased by SEK 25bn in 2019.

Assets under management and custody

Total *assets under management* amounted to SEK 1,943bn (1,699). The market value increased by SEK 200bn of which SEK 16bn was an FX-effect. The net inflow of assets since year-end amounted to SEK 44bn. In the third quarter standalone, the market value increased by SEK 39bn while there was a net outflow of SEK 29bn. The net outflow was caused by low-fee business volumes that were held for customers, but not proactively managed. Other assets under management flows developed positively.

Assets under custody increased compared with year-end and amounted to SEK 9,267bn (7,734). The increase was mainly driven by the stock market appreciation and a number of large new custody mandates.

¹⁾ Unrealised valuation change from counterparty risk (CVA) and own credit risk standing in derivatives (DVA). Own credit risk for issued securities (OCA) is reflected in Other comprehensive income.

Business development

In Sweden, SEB was named Business Bank of the Year for 2019 by Finansbarometern – an acknowledgement of the bank's strategic direction. Furthermore, the result of the Swedish Quality Index survey showed that SEB's customer satisfaction improved more than the industry average both among private and corporate customers.

A number of transformative actions and initiatives are underway within each of the focus areas in SEB's business plan:

Advisory leadership

SEB's private banking services are continuously under improvement. In the third quarter, private banking customers were provided access to a comprehensive overview of their investments including historical development and asset allocations. This significant improvement provides a better basis for advice and investment decisions.

SEB signed the UNEP Principles for Responsible Banking that are in line with the UN Development Goals and the Paris climate agreement. The bank is committed to continue to adapt the business strategy accordingly and has undertaken to measure and follow up its positive and negative climate impact. SEB also joined the non-profit association the Swedish National Advisory Board for Impact Investing. The purpose is to promote and mobilise private, institutional and non-governmental funding of solutions to challenges in society. Impact investments combine social, environmental and financial goals for a common good.

Operational excellence

SEB Campus, a key component in the business plan, was launched. This digital learning platform provides a wide choice of education. All co-workers have been challenged to spend twenty hours during the remainder of the year to drive their own development.

Increasing efficiency and customer value through improved ways of working is constantly underway in various parts of the bank. Examples include an automated application process for new mortgage loans, improved information and services to customers nearing pension, reallocating certain insurance administration to the Baltic service center, automating controls of regulatory reporting and automatic monitoring of payment transactions to prevent financial crime and ensure regulatory compliance.

Extended presence

SEBx – SEB's independent innovation venture – entered into a partnership with the fintech company, Thought Machine, to use its cloud-based core banking engine as part of its technology platform.

SEB's mobile bank app is taking advantage of the open banking opportunities. In the third quarter, private individuals were provided the possibility to have an aggregated overview of their accounts, savings and loans in other banks, not just SEB.

In addition to free bank services, the student offering was enhanced to include six months of home insurance for free via the mobile bank app. This is in co-operation with the insurance company Hedvig.

Risk, capital and uncertainties

SEB assumes credit, market, liquidity, IT and operational as well as life insurance risks. The risk composition of the Group, as well as the related risk, liquidity and capital management, are described in SEB's Annual Report for 2018 (see page 44-49 and notes 41 and 42), in the Capital Adequacy and Risk Management Report for 2018 as well as the quarterly additional Pillar 3 disclosures. Further information is available in the Fact Book that is published quarterly.

Credit risk

SEK bn	30 Sep	31 Dec	30 Sep
	2019	2018	2018
Banks	98	93	100
Corporates	1 293	1 146	1 133
Commercial real estate management	191	186	186
Residential real estate management	126	110	108
Housing co-operative associations Sweden	63	63	63
Public administration	61	55	65
Household mortgage	588	552	552
Household other	88	87	87
Total credit portfolio	2 510	2 292	2 294

Certain balances in the credit portfolio disclosure were reclassified during the first quarter 2019 to better reflect the portfolio characteristics. Historic information has been restated. The geographic split of the credit portfolio as presented in the Fact Book is now based on SEB's operations which matches where profits are reported. Furthermore, collateral margin is reflected based on an exposure-at-default amount rather than a nominal amount and repos are now included, also based on an exposure-at-default value.

SEB's credit portfolio, which includes loans, contingent liabilities and derivatives, increased by SEK 218bn to SEK 2,510bn (2,292). The corporate credit portfolio increased by SEK 147bn, or 13 per cent. The FX-adjusted corporate growth was 6 per cent. The household credit portfolio increased by SEK 38bn and commercial and residential real estate management increased by SEK 21bn.

Credit-impaired loans, gross (stage 3) increased since year-end by SEK 3,083m to SEK 11,242m. The gross credit-impaired loans (stage 3) were 0.65 per cent of total loans.

Market risk

SEB's business model is mainly driven by customer demand. 10-day Value-at-Risk (VaR) in the trading book increased during the first nine months and averaged SEK 102m compared with SEK 90m for the year 2018. The Group does not expect to lose more than this amount, on average, during a period of ten trading days with 99 per cent probability.

VaR decreased to SEK 99m in the third quarter (114 for the second quarter) mainly due to lower interest rate risk.

Liquidity and long-term funding

Short-term funding, in the form of commercial paper and certificates of deposit, increased by SEK 200bn since year-end 2018. The reason for the increase was mainly the fulfilment of regulatory requirements on liquidity coverage in key currencies.

SEK 98bn of long-term funding matured during the first nine months of 2019 (of which SEK 52bn covered bonds and SEK 46bn senior debt). New issuance since year-end amounted to SEK 86bn (of which SEK 65bn was covered bonds and SEK 22bn senior preferred debt).

The liquid assets defined according to the EU delegated act with regard to liquidity coverage requirements amounted to SEK 567bn at 30 September 2019 (403). The Liquidity

Coverage Ratio (LCR) must be at least 100 per cent. At the end of the quarter, the LCR was 174 per cent (147).

The bank is committed to a stable funding base. SEB's internal structural liquidity measure, Core Gap, which measures the proportion of stable funding in relation to illiquid assets, was 108 per cent (110).

Rating

Moody's rates SEB's long-term senior unsecured debt at Aa2 with a stable outlook reflecting SEB's asset quality and solid capitalisation underpinned by strong earnings generation capacity and good profitability.

Fitch rates SEB's long-term senior unsecured debt at AA- with a stable outlook. The rating is based on SEB's strong capital and leverage ratios, sound asset quality and healthy liquidity profile.

S&P rates SEB's long-term senior unsecured debt at A+ with a stable outlook. The rating is based on the bank's leading corporate franchise, strong capitalisation underpinned by stable earnings and sound asset quality.

Capital position

The following table shows the risk exposure amount (REA) and capital ratios according to Basel III:

	30 Sep	31 Dec	30 Sep
Own funds requirement, Basel III	2019	2018	2018
Risk exposure amount, SEK bn	777	716	632
Common Equity Tier 1 capital ratio, %	16.4	17.6	19.7
Tier 1 capital ratio, %	18.5	19.7	22.1
Total capital ratio, %	20.9	22.2	25
Leverage ratio, %	4.5	5.1	4.8

SEB's Common Equity Tier 1 (CET1) capital ratio was 16.4 per cent (17.6). The implementation of IFRS 16 in the first quarter lowered the CET 1 ratio by 15 basis points, all else equal. Otherwise, the main reason for the decrease in the CET1 capital ratio was the increase by SEK 61bn in REA (see table).

SEB's estimate of the full Pillar 1 and 2 CET1 capital requirements – where the Pillar 2 requirements were calculated according to the methods set by the Swedish Financial Supervisory Authority (SFSA) – was 14.7 per cent per the end of the period (14.9 at year-end). The Swedish countercyclical buffer increased by 0.3 percentage units in the third quarter, but was offset by lower Pillar 2 requirements for pension risk and interest rate risk in the banking book. The bank aims to have a buffer of around 150 basis points above the capital requirement. The buffer shall cover sensitivity to currency fluctuations, changes in net value of the Swedish defined benefit pension plan as well as general macroeconomic uncertainties. Currently the buffer is 170 basis points.

Underlying market and operational risk changes	9
- where of market risk	8
- where of operational risk	0
- where of CVA risk	1
Balance 30 Sep 2019	777

Total REA increased by SEK 61bn to SEK 777bn since year-end 2018. Foreign exchange movements and increasing credit volumes, primarily corporate, contributed to higher credit risk REA. Market risk REA increased in the second quarter but reverted somewhat in the third quarter. Model updates increased REA by SEK 8bn, primarily due to the implementation of IFRS 16 and updated credit risk models in the Baltic division.

In accordance with SFSA requirements, the additional REA related to the mortgage risk-weight floor was reclassified from a Pillar 2 to a Pillar 1 requirement per 31 December 2018. This REA amounted to SEK 95bn at the end of the period (92 at year-end).

Internally assessed capital requirement

As per 30 September 2019, the internally assessed capital requirement, including insurance risk, amounted to SEK 70bn (67). The internal capital requirement is assessed using SEB's internal models for economic capital and is not fully comparable to the estimated capital requirement published by the SFSA due to differences in assumptions and methodologies.

The internally assessed capital requirement for the parent company amounted to SEK 67bn (62).

Other information

Long-term financial targets

SEB's long-term financial targets are:

- to pay a yearly dividend that is 40 per cent or above of the earnings per share,
- to maintain a Common Equity Tier 1 capital ratio of around 150 bps above the current requirement from the SFSA, and
- to generate a return on equity that is competitive with peers.

In the long term, SEB aspires to reach a sustainable return on equity of 15 per cent.

Cost target

SEB's business plan for 2019-2021 defines a number of strategic initiatives, which on an accumulated basis, are estimated to lead to total additional investments of SEK 2-2.5bn during the three year period 2019-2021. This translates into an annual cost increase of SEK 1bn by 2021, and a new total cost target of around SEK 23bn by 2021, assuming 2018 FX-rates. The pace of investments will be dependent on progress and will be gradually ramped up over the coming three years. The strategic initiatives are expected to lead to both improved revenue growth and cost efficiencies, improving return on equity over time.

Resolution fund fee requirement change

Swedish authorities decided that the resolution fund fee for 2019 shall be reduced from 0.125 to 0.09 per cent applied to the adjusted 2017 balance sheet volumes. The fee will be reduced to 0.05 per cent from 2020 up until the resolution fund target is met. The fund target level, proposed to represent 3 per cent of guaranteed deposits in Sweden, is expected to be reached by the year 2021.

Currency effects

Compared with the second quarter 2019, operating income would have been SEK 6m lower with unchanged currency exchange rates while operating expenses would have been SEK 5m lower for the same period.

Compared with the first nine months 2018, operating income would have been SEK 417m lower with unchanged currency exchange rates while operating expenses would have been SEK 193m lower for the same period.

Compared with year-end the positive currency effect on loans to and deposits from the public was SEK 37bn and 33bn, respectively. Total REA reflects a SEK 20bn positive currency effect while total assets were SEK 70bn higher.

Uncertainties

Macroeconomic indicators are contributing to growing concerns around a noticeable slowdown in growth. The large global economic imbalances and geopolitical as well as trade uncertainties remain. The potential reduction of liquidity support to financial markets from central banks worldwide may create direct and indirect effects that are difficult to assess. SEB does not currently forecast any change in the

Swedish repo rate, which is currently -0.25 per cent, until 2021.

The German Federal Ministry of Finance issued a circular on 17 July 2017 with administrative guidance in relation to withholding taxes on dividends in connection with certain cross-border securities lending and derivative transactions; so-called cum-cum transactions. The circular states an intention to examine transactions executed prior to the change in tax legislation that was enacted 1 January 2016. Ongoing audits by the local tax administration have to date resulted in preliminary minor reclaims on selected tax years. SEB has requested that these reclaims should be revoked. Following a review, SEB is of the opinion that the cross-border securities lending and derivative transactions of SEB in Germany up until 1 January 2016 were conducted in compliance with then prevailing rules. Hence, to date no provisions have been made. Nevertheless, it cannot be ruled out that the outcome of potential future tax claims may have a negative financial effect on SEB.

SEB is subject to various legal regimes and requirements in all jurisdictions where the bank operates. Over the past years, the rules and regulations of the financial industry have expanded and further sharpened and the regulators have increased their supervision. This is a development, which is expected to continue to evolve. Supervisory authorities regularly conduct reviews of SEB's regulatory compliance, including areas such as financial stability, transaction reporting, anti-money laundering, investor protection, and data privacy. SEB has policies and procedures in place with the purpose to always comply with applicable rules and regulations. Anti-money laundering (AML) reviews are ongoing in several jurisdictions, including the Nordic and the Baltic countries. In Latvia, as part of the regular supervisory activities, the local financial supervisory authority is conducting an AML review. It is expected to be resolved in the coming quarter and may lead to criticism and/or sanction.

Organisational changes

Masih Yazdi (Finance Director) has been appointed Group CFO. He will continue to report to the President & CEO and remain member of the GEC. Nina Korfu-Pedersen (Head of Group Finance) has been appointed Head of Business Support & Operations. She will continue to report to the President & CEO and remain member of the GEC. Petra Ålund (Head of Technology) has been appointed member of the GEC and will report to the President & CEO. Nicolas Moch (CIO) will report to Petra Ålund and will also be joining as member of the GEC. Martin Johansson has been appointed Senior Advisor to the President & CEO and will leave his current role as Head of Business Support & Chief of Staff. He will leave as member of the Group Executive Committee (GEC) and continue as one of its additional members. Javiera Ragnartz (Head of Investment Management) and Mark Luscombe (Country Head of UK) have been appointed additional members of the GEC. All changes are effective as of 1 January 2020.

2) Loans to credit institutions and liquidity placements with other direct participants in interbank fund transfer systems.

3) IFRS 16 Leases is applied from 1 January 2019. The group has decided to apply the modified retrospective approach (i.e. no restatement made). Right-of-use assets are included in Other assets and lease liabilities are included in Other liabilities from 2019. Increase in Other assets at 1 January 2019 stems from an increase in Right-of-use assets SEK 5,747m, Deferred tax assets SEK 51m and Other assets SEK 141m. Increase in Other liabilities at 1 January is a result of an increase in Lease liabilities SEK 6,337m offset by decreases in Provisions SEK 122m and Other liabilities SEK 32m.

A more detailed balance sheet is available in the Fact Book.

1) Amounts under Other reserves may be reclassified in the future to the income statement under certain circumstances, e.g. if they are related to dissolved Cash flow hedges or Translation of foreign operations when SEB ceases to consolidate a foreign operation. Amounts related to OCA and Defined benefit plans will not be reclassified to the income statement.

2) Fair value changes of financial liabilities at fair value through profit or loss attributable to changes in own credit risk.

3) IFRS 16 Leases is applied from 1 January 2019.

4) IFRS 9 Financial Instruments is applied from 1 January 2018. Opening balance 2018 has been restated in fourth quarter 2018 with a positive amount of SEK 884m.

5) Number of shares owned by SEB:

	Jan-Sep 2019	Jan-Dec 2018	Jan-Sep 2018
Number of shares owned by SEB, million	2019	2018	2018
Opening balance	30.3	27.1	27.1
Repurchased shares for equity-based programmes	8.7	6.9	7.0
Sold/distributed shares	-5.7	-3.8	-3.2
Closing balance	33.2	30.3	30.9
Market value of shares owned by SEB, SEK m	3 006	2 607	3 067

In accordance with the decision by the Annual General Meeting, SEB holds own shares of Class A for the long-term equity-based programmes. The transactions may take place at one or several occasions during the year. The acquisition cost for the purchase of own shares is deducted from shareholders' equity. The item includes changes in nominal amounts of equity swaps used for hedging of equity-based programmes.

1) Investment Management & Group functions consists of Investment Management, business support, treasury, staff units and German run-off operations. As previously communicated, on 1 January 2019 SEB reorganised its operations by splitting the division Life & Investment Management into two separate divisions. The Life division is presented on a stand-alone basis. The Investment Management division is combined and reported with group functions as one segment in the interim Report and in addition presented separately in the Fact Book. Earlier periods have been restated in the segment information.

Large Corporates & Financial Institutions

The division offers commercial and investment banking services to large corporate and institutional clients in the Nordic region, Germany and the United Kingdom. Customers are also served through an international network in some 20 offices.

- Large corporate customers continued to be very active
- Investments with sustainability criteria continued to grow rapidly among institutional investors
- Operating profit amounted to SEK 6,953m and return on business equity was 10.5 per cent

Comments on the first nine months

There was high customer activity across all product areas in the *Large Corporate* segment. After a cautious period, cash rich companies started to invest excess liquidity. Demand for cash management services was high. The lending portfolio increased, partly due to event-driven financing on the back of corporate finance activity. The low interest rates were favourable for new bond issues. Within the financial sponsor segment, customer activity decreased somewhat as a result of lower merger and acquisition volumes. The private equity market continued to be highly liquid with high asset prices.

Customers in the *Financial Institutions* segment became less active during the year as global macroeconomic concerns pushed the expected rate hikes into the future. Customers handled the uncertainty with cautiousness when hedging and allocating investments. While volatility and demand for traditional asset classes were low, the interest in illiquid investments, private equity and hedge funds increased.

Investments with sustainability criteria continued to grow, mainly driven by new regulatory requirements. Assets under custody increased to SEK 9,267bn (7,734), a proof of SEB's attractive custody offering with several new mandates.

Operating income for the first nine months increased to SEK 14,883m. Net interest income improved to SEK 6,921m mainly due to increased lending and deposit volumes. Other factors were the reduced resolution fund fee and internal pricing on deposits. Net fee and commission income increased slightly to SEK 4,735m driven by bond issues and mergers and acquisitions. Net financial income increased to SEK 3,028m mainly related to higher market activity in the beginning of the year. Additional employees contributed to increased operating expenses. Asset quality was high, however net expected credit losses increased to SEK 933m with a net expected credit loss level of 11 basis points.

Corporate & Private Customers

The division offers full banking and advisory services to private individuals and small and medium-sized corporate customers in Sweden, as well as card services in four Nordic countries. Nordic high net-worth individuals are offered leading private banking services with global reach.

- Steady corporate lending growth
- High market share on new household mortgage sales during the second and third quarter
- Operating profit amounted to SEK 6,797m and return on business equity was 15.4 per cent

Comments on the first nine months

During the first nine months customer inflow and interaction were strong. New and appreciated functionalities were launched in the digital channels and customer satisfaction regarding advisory services remained high, especially among small- and medium sized companies and private customers, where satisfaction reached record levels during 2019.

Operating profit increased by 13 per cent. Net interest income increased by 13 per cent or SEK 949m, driven by the less negative interest rate environment following the repo rate hike in the beginning of the year, internal deposit pricing and volume growth. Net fee and commission income decreased by 2 per cent compared to previous year, mainly due to MiFID II related effects, although SEB Kort experienced strong growth in the corporate segment. Total operating expenses increased by 3 per cent, partly driven by increased IT development and regulatory demands. Net expected credit losses were low at SEK 301m with a net expected credit loss level of 4 basis points.

Corporate lending grew above overall market growth, driven by the small- and medium-sized segment. New full-service customers and customer activity resulted in increasing deposits and lending volumes adding up to higher corporate net interest income compared to last year. Corporate lending volumes grew by SEK 15bn since year-end and amounted to SEK 257bn.

Among private customers SEB had a strong focus on the household mortgage business, which resulted in a high new sales market share during the second and third quarter. Mortgage volumes grew by SEK 19bn since year-end and amounted to SEK 501bn. Private Banking experienced yet another quarter with strong growth in underlying business.

In total, lending volumes experienced steady growth, increasing by SEK 36bn to SEK 817bn. The inflow of total deposits continued and volumes grew by SEK 35bn to SEK 456bn (421).

Baltic

The division provides full banking and advisory services to private individuals and small and medium-sized corporate customers in Estonia, Latvia and Lithuania.

¹⁾ Quarterly numbers are for end of quarter. Accumulated numbers are average for the period.

- Signs of economic slowdown
- Continued growth in loan and deposit volumes
- Operating profit amounted to SEK 2,294m and return on business equity was 24.5 per cent

Comments on the first nine months

The Baltic economies appeared to expand at a slower pace in the third quarter due to weaker industrial production, mainly linked to the deteriorating economic outlook in Western Europe. Private consumption has so far remained resilient, supported by rapid growth in real wages, low unemployment and healthy consumer confidence levels. Looking forward, potential weakening of the global economic outlook is the main concern for domestic businesses in the short term.

In the private segment, the stable growth in lending continued, led by mortgage loans where the margin on new lending remained above the average of the portfolio. Private customers were also more active using cards and payments products. Customers' use of SEB's digital service offerings increased, with an increasing number of video meetings and a higher share of sales transacted digitally. Income growth continued in the corporate segment driven mainly by an increase in the

loan portfolio. Total lending volumes grew by 4 per cent in local currency in the first nine months and amounted to SEK 160bn (148). There was steady growth in deposits in both private and corporate segments. Total deposit volumes grew by 5 per cent in local currency and amounted to SEK 151bn (138).

Operating profit increased by 14 per cent in local currency, or by SEK 346m, to SEK 2,294m. Net interest income increased by 11 per cent in local currency mainly due to higher lending volumes, but also due to expanded margins. Net fee and commission income was 10 per cent higher in local currency, mainly from increased customer activity and more card transactions. Operating expenses were 1 per cent higher in local currency, reflecting mainly the salary inflation prevalent across the region. Net expected credit losses were low at SEK 41m with a net expected credit loss level of 3 basis points.

Life

The division offers life insurance solutions to private as well as corporate and institutional clients mainly in the Nordic and Baltic countries.

- Continued positive inflow in traditional insurance in Sweden
- Asset values increased in strong financial markets
- Operating profit amounted to SEK 1,259m and return on business equity was 28.8 per cent

Comments on the first nine months

Customers' demand for life insurance products, primarily in occupational pension and traditional life insurance, increased throughout the year. The competition and price pressure continues and it affects our ability to both retain and attract premiums. The financial markets were strong during the year. Customers in the Swedish traditional portfolios continued to benefit from strong investment performance return (9.6 per cent for occupational pension and 8.4 per cent for other insurance).

Total assets in the division's unit-linked insurance business increased from the beginning of the year by SEK 37bn to SEK 307bn. The increase is due to higher asset values in the financial markets.

Operating profit decreased by 21 per cent to SEK 1,259m year-on-year. The decrease in both income and expenses compared with 2018 was partly explained by the divestment of SEB Pension Denmark in 2018. Excluding this divestment, the nine-month profit decreased by 10 per cent or SEK 133m year-on-year. Net fee and commission income decreased compared to last year due to the divestment effect and margin pressure. Net financial income decreased compared to last year due to lower result in Swedish risk insurance, negative effects in traditional insurance from lower long-term interest rates as well as the divestment. Excluding the divestment, expenses were stable during the year.

Investment Management & Group functions

The Investment Management division manages SEB funds and mandates for customers channelled via the other divisions. Group functions consist of business support, Group Treasury, the German run-off operations and other.

- SEB's assets under management fulfilling SEB's sustainability criteria increased to SEK 250bn
- SEB labelled mutual funds' asset values increased, driven by inflows and positive markets
- Operating profit amounted to SEK 535m

Comments on the first nine months

Investment Management: Volatility in the market continued also in the third quarter. Assets under management increased compared to the corresponding period last year driven by net inflows and positive market development. SEB labelled mutual funds amounted to SEK 724bn in total (685) of which SEK 250bn is managed according to SEB's sustainability criteria.

Operating income increased by 4 per cent year-on-year. Base commissions decreased with 2 per cent in the same period despite increased asset values. As part of the market trend, customer inflows continued to be in lower margin products, with outflows in high margin products. Volumes continued to increase in passively managed funds and products with less exposure to the equity markets. Performance fees increased compared

to the same period last year. Operating profit increased slightly year-on-year.

Group Treasury: Net interest income decreased compared with the first nine months of 2018 since the compensation paid to the business divisions for deposits increased. Net financial income was lower due to the mark-to-market valuation effect on own issued securities in the German run-off operations. In the same unit, net other income was higher, explained by the effect of a repurchase of own issued securities especially in the second quarter 2018.

Business support provides IT operations and development as well as back office services to the divisions. All relevant costs are charged to the divisions to be reflected in their results.

Other consists of Group staff, risk and compliance functions and other various smaller units.

Notes to the financial statements - the SEB Group

Note 1 Accounting policies

This Interim Report is presented in accordance with IAS 34 Interim Financial Reporting. The group's consolidated accounts have been prepared in accordance with the International Financial Reporting Standards (IFRS) and interpretations of these standards as adopted by the European Commission. The accounting also follows the Annual Accounts Act for Credit Institutions and Securities Companies (1995:1559) and the regulation and general guidelines issued by the Swedish Financial Supervisory Authority: Annual Reports in Credit Institutions and Securities Companies (FFFS 2008:25). In addition, the Supplementary Accounting Rules for Groups (RFR 1) from the Swedish Financial Reporting Board have been applied. The parent company has prepared its accounts in accordance with Swedish Annual Act for Credit Institutions and Securities Companies, the Swedish Financial Supervisory Authority's Regulations and General Guidelines (FFFS 2008:25) on Annual Reports in Credit Institutions and Securities Companies and the Supplementary Accounting Rules for Legal Entities (RFR 2) issued by the Swedish Financial Reporting Board.

As of 1 January 2019, the group adopted IFRS 16 Leases, which replaces IAS 17 and related interpretations. For more information about the new accounting policies and the transitional effects from adopting IFRS 16, see note 54 in the

Annual Report 2018. There are also some smaller changes to other IFRS standards. IFRIC 23 Uncertainty over Income Tax Treatments has been issued and specifies how to reflect the effects of uncertainty in accounting for income taxes. IAS 28 Interests in Associates and Joint Ventures has been amended so companies should apply IFRS 9 Financial Instruments to long-term interests in an associate or joint venture that form part of the net investment in the associate or joint venture. Amendments have been made to IFRS 9 Financial Instruments regarding prepayment features with negative compensation. IAS 19 Employee Benefits was amended in regards to plan amendment, curtailment or settlement that arises during the reporting period. IAS 23 Borrowing Costs, IAS 12 Income Taxes, IFRS 3 Business Combinations and IFRS 11 Joint Arrangements have been amended within the Annual improvement cycle 2015–2017. The changes have not had a material effect on the financial statements of the group or on capital adequacy and large exposures.

In all other material aspects, the group's and the parent company's accounting policies, basis for calculations and presentations are unchanged in comparison with the 2018 Annual Report.

1) Investment Management & Group functions consists of Investment Management, business support, treasury, staff units and German run-off operations. As previously communicated, on 1 January 2019 SEB reorganised its operations by splitting the division Life & Investment Management into two separate divisions. The Life division is presented on a stand-alone basis. The Investment Management division is combined and reported with group functions as one segment in the interim Report and in addition presented separately in the Fact Book. Earlier periods have been restated in the segment information.

Fee and commission income is disaggregated in major types of service tied to primary geographical markets and operating segments. Revenues from Issue of securities and advisory, Secondary market and derivatives, Payments, cards, lending and deposits are mainly recognised at a point in time. Revenues from Custody and mutual funds and Life insurance commissions are mainly recognised over time.

Items affecting comparability 2018

The total income in the income statement from Items affecting comparability was SEK 4,506m before tax and SEK 4,528m after tax.

SEB Pension (2018 Q2)

SEB completed the sale of SEB Pension in Denmark following the approval by the Danish Competition Council, Konkurrencerådet, on 30 May 2018. SEB divested all shares in SEB Pensionsforsikring A/S and SEB Administration A/S (SEB Pension) to Danica Pension Livsforsikringsaktieselskab (Danica), a subsidiary to Danske Bank. The entire business, including employees, customer contracts and systems, transferred from SEB to Danica on 7 June 2018. The in principle tax-exempt capital gain from the transaction amounted to SEK 3,565m.

UC (2018 Q2)

On 29 June 2018, the acquisition by the listed Finnish credit information company Asiakastieto Group Plc (Asiakastieto) of UC AB (UC) was finalised. SEB received shares in Asiakastieto, equivalent to 10.2 per cent of the company, and SEK 0.3bn in cash. The transaction resulted in a tax-exempt capital gain of SEK 941m.

1) Loans includes Cash balances at central banks (excluding Cash), Loans to central banks, Loans to credit institutions and Loans to the public.

2) Debt securities issued includes Debt securities issued and Subordinated liabilities (part of Other liabilities).

SEB has classified its financial instruments by class taking into account the characteristics of the instruments. The fair value of each class of financial assets and liabilities are compared with its carrying amount. A description of the characteristics of the classes can be found in note 38 in the Annual Report 2018.

1) Venture capital activities designated at fair value through profit and loss.

Fair value measurement

The objective of the fair value measurement is to arrive at the price at which an orderly transaction would take place between market participants at the measurement date under current market conditions.

The group has an established control environment for the determination of fair values of financial instruments that includes a review, independent from the business, of valuation models and prices. If the validation principles are not adhered to, the Head of Group Finance shall be informed. Exceptions of material and principal importance require approval from the GRMC (Group Risk Measurement Committee) and the ARC (Accounting Reporting Committee).

In order to arrive at the fair value of a financial instrument SEB uses different methods; quoted prices in active markets, valuation techniques incorporating observable data and valuation techniques based on internal models. For disclosure purposes, financial instruments carried at fair value are classified in a fair value hierarchy according to the level of market observability of the inputs. Group Risk classifies and continuously reviews the classification of financial instruments in the fair value hierarchy. The valuation process is the same for financial instruments in all levels.

An active market is one in which transactions occur with sufficient volume and frequency to provide pricing information on an ongoing basis. The objective is to arrive at a price at which a transaction without modification or repackaging would occur in the principal market for the instrument to which SEB has immediate access.

Fair value is generally measured for individual financial instruments, in addition portfolio adjustments are made to cover the credit risk. To reflect counterparty risk and own credit risk in OTC derivatives, adjustments are made based on the net exposure towards each counterpart. These adjustments are calculated on a counterparty level based on estimates of exposure at default, probability of default and recovery rates. Probability of default and recovery rate information is generally sourced from the CDS markets. For counterparties where this information is not available, or considered unreliable due to the nature of the exposure, alternative approaches are taken where the probability of default is based on generic credit indices for specific industry and/or rating.

When valuing financial liabilities at fair value SEB's own credit standing is reflected.

In order to arrive at the fair value of investment properties a market participant's ability to generate economic benefit by using the asset in its highest and best use are taken into account. The highest and best use takes into account the use of the asset that is physically possible, legally permissible and financially feasible. The current use of the investment properties in SEB is in accordance with the highest and best use. The valuation of investment properties is described in the accounting policies in Annual Report note 1. The valuation of the investment properties is performed semi-annually, they are presented and approved by the board in each real estate company. The valuation principles used in all entities are in accordance with regulations provided by the local Financial Supervisory Authorities (FSA) which is in accordance with international valuation principles and in accordance with IFRS.

Level 1: Quoted market prices

Valuations in Level 1 are determined by reference to unadjusted quoted market prices for identical instruments in active markets where the quoted prices are readily available and the prices represent actual and regularly occurring market transactions on an arm's length basis.

Examples of Level 1 financial instruments are listed equity securities, debt securities, and exchange-traded derivatives. Instruments traded in an active market for which one or more market participants provide a binding price quotation on the balance sheet date are also examples of Level 1 financial instruments.

Level 2: Valuation techniques with observable inputs

In Level 2 valuation techniques, all significant inputs to the valuation models are observable either directly or indirectly. Level 2 valuation techniques include using discounted cash flows, option pricing models, recent transactions and the price of another instrument that is substantially the same.

Examples of observable inputs are foreign currency exchange rates, binding securities price quotations, market interest rates (Stibor, Libor, etc.), volatilities implied from observable option prices for the same term and actual transactions with one or more external counterparties executed by SEB. An input can transfer from being observable to being unobservable during the holding period due to e.g. illiquidity of the instrument. Examples of Level 2 financial instruments are most OTC derivatives such as options and interest rate swaps based on the Libor swap rate or a foreign-denominated yield curve. Other examples are instruments for which SEB recently entered into transactions with third parties and instruments for which SEB interpolates between observable variables.

Note 9, continued. Assets and liabilities measured at fair value

Level 3: Valuation techniques with significant unobservable inputs

Level 3 valuation techniques incorporate significant inputs that are unobservable. These techniques are generally based on extrapolating from observable inputs for similar instruments, analysing historical data or other analytical techniques. Examples of Level 3 financial instruments are more complex OTC derivatives, long dated options for which the volatility is extrapolated or derivatives that depend on an unobservable correlation. Other examples are instruments for which there is currently no active market or binding quotes, such as unlisted equity instruments, private equity holdings and investment properties.

If the fair value of financial instruments includes more than one unobservable input, the unobservable inputs are aggregated in order to determine the classification of the entire instrument. The level in the fair value hierarchy within which a financial instrument is classified is determined on the basis of the lowest level of input that is significant to the fair value in its entirety.

Significant transfers and reclassifications between levels

Transfers between levels may occur when there are indications that market conditions have changed, e.g. a change in liquidity. The Valuation/Pricing committee of each relevant division decides on material shifts between levels. At the end of the third quarter 2019 Equity instruments (Fund assets) within the insurance holdings at the amount of SEK 2.3bn have been transferred from level 2 into level 3. The transfers are a result of calibration of the classification methodology, in particular with regards to investment funds and other collective investment vehicles. The reclassification generates an increase of the sensitivity of Level 3 assets and liabilities to unobservable inputs of SEK 293m. The largest open market risk within Level 3 financial instruments remains in the traditional life insurance investment portfolios within the insurance business.

1) Fair value gains and losses recognised in the income statement are included in Net financial income and Net other income.

Sensitivity of Level 3 assets and liabilities to unobservable inputs

The table below illustrates the potential Profit or Loss impact of the relative uncertainty in the fair value of assets and liabilities that for their valuation are dependent on unobservable inputs. The sensitivity to unobservable inputs is assessed by altering the assumptions to the valuation techniques, illustrated below by changes in index-linked swap spreads, implied volatilities, credit spreads or comparator multiples. It is unlikely that all unobservable inputs would be simultaneously at the extremes of their ranges of reasonably possible alternatives.

SEK m	30 Sep 2019				31 Dec 2018			
	Assets	Liabilities	Net	Sensitivity	Assets	Liabilities	Net	Sensitivity
Derivative instruments ¹⁾²⁾⁴⁾	491	-520	-29	35	510	-473	37	45
Equity instruments ³⁾⁶⁾	3 323	-67	3 256	654	2 584	-63	2 521	505
Insurance holdings - Financial instruments ⁴⁾⁵⁾⁷⁾	10 053		10 053	1 288	5 576		5 576	697

1) Sensitivity from a shift of inflation linked swap spreads by 16 basis points (16) and implied volatilities by 5 percentage points (5).

2) Sensitivity from a shift of swap spreads by 5 basis points (5).

3) Valuation is estimated in a range of reasonable outcomes. Sensitivity analysis is based on 20 per cent (20) shift in market values.

4) Shift in implied volatility by 10 percentage points (10).

5) Sensitivity analysis is based on a shift in private equity of 20 per cent (20), structured credits 10 per cent (10) and derivative market values of 10 per cent (10).

6) Sensitivity from a shift of investment properties/real estate funds/infrastructure/infrastructure funds market values of 10 per cent (10).

7) The sensitivity show changes in the value of the insurance holdings which do not at all times affect the P&L of the Group since any surplus in the traditional life portfolios are consumed first.

1) Excluding demand deposits credit institutions and including trade and client receivables presented as other assets.

2) Whereof gross carrying amounts SEK 1,507m (1,169/1,318) and ECL allowances SEK 2m (2/1) under Lifetime ECLs - simplified approach for trade receivables.

3) Whereof gross carrying amounts SEK 2,225m (1,281/0) and ECL allowances SEK 909m (349/0) for Purchased or Originated Credit Impaired loans.

The table shows gross carrying amounts for exposures on balance and nominal amounts for exposures off-balance divided by stage as a mean to put ECL allowances in context to overall exposure levels. For trade receivables a simplified approach based on past-due information is used to calculate loss allowances.

¹⁾ Own funds requirement 8% of risk exposure amount according to Regulation (EU) No 575/2013 (CRR).

²⁾ Additional risk exposure amount according to Article 458, Regulation (EU) No 575/2013 (CRR), for risk-weight floors in the Swedish mortgage portfolio.

Note 16 Average risk-weight

The following table summarises average risk-weights (risk exposure amount divided by exposure at default, EAD) for exposures, where the risk exposure amount is calculated according to the internal ratings based (IRB) approach. Repos and securities lending transactions are excluded from the

analysis, since they carry low risk-weights, and can vary considerably in volume, thus making numbers less comparable.

IRB reported credit exposures (less repos and securities lending)	30 Sep 2019	31 Dec 2018	30 Sep 2018
Average risk-weight			
Exposures to central governments or central banks	3.0%	3.0%	2.6%
Exposures to institutions	24.3%	25.4%	25.7%
Exposures to corporates	30.8%	31.0%	31.1%
Retail exposures	10.5%	10.2%	10.3%
of which secured by immovable property	6.9%	6.8%	6.8%
of which retail SME	59.2%	57.7%	58.5%
of which other retail exposures	32.0%	30.8%	30.3%
Securitisation positions	9.5%	9.3%	10.3%

Signature of the President

The President declares that the Interim Report for the period 1 January 2019 through 30 September 2019 provides a fair overview of the parent company's and the group's operations, their financial position and results and describes material risks and uncertainties facing the parent company and the group.

Stockholm, 23 October 2019

Johan Torgeby
President and Chief Executive Officer

Auditor's review report

To the Board of Directors in Skandinaviska Enskilda Banken AB (publ), 502032-9081

Introduction

We have reviewed the nine-month interim financial statements for Skandinaviska Enskilda Banken AB (publ) as at 30 September 2019 and for the nine-month period ending as at this date. The Board of Directors and the Chief Executive Officer are responsible for the preparation and presentation of these interim financial statements in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies. Our responsibility is to express a conclusion on these interim financial statements based on our review.

Scope of review

We have conducted our review in accordance with the International Standard on Review Engagements ISRE 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review consists of making inquiries, primarily to persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review differs from and is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and other generally accepted auditing standards in Sweden. The procedures performed in a review do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim financial statements are not prepared, in all material respects, in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies regarding the Group, and in accordance with the Annual Accounts Act for Credit Institutions and Securities Companies regarding the parent company.

Stockholm, 23 October 2019

29 April 2020	Interim Report January-March 2020	The silent period starts 1 April 2020
15 July 2020	Interim Report January-June 2020	The silent period starts 1 July 2020
22 October 2020	Interim Report January-September 2020	The silent period starts 1 October 2020

The financial information calendar for 2021 will be published in conjunction with the Interim Report for January-September 2020.

Definitions - Alternative Performance Measures¹⁾

Items affecting comparability

To facilitate the comparison of operating profit between current and previous periods, items with significant impact that management considers affect the comparability or are relevant for the understanding of the financial result, are identified and presented separately, for example impairment of goodwill, restructuring, gains and losses from divestments and other income or costs that are not recurring.

Operating profit

Total profit before tax.

Operating profit before items affecting comparability

Total profit before items affecting comparability and tax.

Net profit

Total profit after tax.

Return on equity

Net profit attributable to shareholders in relation to average²⁾ shareholders' equity.

Return on equity excluding items affecting comparability

Net profit attributable to shareholders, excluding items affecting comparability and their related tax effect, in relation to average²⁾ shareholders' equity.

Return on business equity

Operating profit by division, reduced by a standard tax rate, in relation to the divisions' average²⁾ business equity (allocated capital).

Return on total assets

Net profit attributable to shareholders, in relation to average²⁾ total assets.

Return on risk exposure amount

Net profit attributable to shareholders in relation to average²⁾ risk exposure amount.

¹⁾ *Alternative Performance Measures, APMs, are financial measures of historical or future financial performance, financial position, or cash flows, other than those defined in the applicable financial reporting framework (IFRS) or in the EU Capital Requirements Regulation and Directive CRR/CRD IV. APMs are used by SEB when relevant to assess and describe SEB's financial situation and provide additional relevant information and tools to enable analysis of SEB's performance. APMs on basic earnings per share, diluted earnings per share, net worth per share, equity per share, return on equity, return on total assets and return on risk exposure amount provide relevant information on the performance in relation to different investment measurements. The cost/income ratio provides information on SEB's cost efficiency. APMs related to lending provide information on provisions in relation to credit risk. All these measures may not be comparable to similarly titled measures used by other companies.*

²⁾ *Average year-to-date, calculated on month-end figures.*

³⁾ *Average, calculated on a daily basis.*

Cost/income ratio

Total operating expenses in relation to total operating income.

Basic earnings per share

Net profit attributable to shareholders in relation to the weighted average³⁾ number of shares outstanding before dilution.

Diluted earnings per share

Net profit attributable to shareholders in relation to the weighted average³⁾ diluted number of shares. The calculated dilution is based on the estimated economic value of the long-term equity-based programmes.

Net worth per share

The total of shareholders' equity, the equity portion of any surplus values in the holdings of debt securities and the surplus value in life insurance operations in relation to the number of shares outstanding.

Equity per share

Shareholders' equity in relation to the number of shares outstanding.

Core gap ratio

Structural liquidity risk measure defined as total liabilities deemed to mature beyond one year in relation to total assets deemed to mature beyond one year.

Expected credit losses, ECL

Probability-weighted credit losses with the respective risk of a default.

ECL allowances

The allowance for expected credit losses on financial assets, contract assets, loan commitments and financial guarantee contracts.

Net ECL level

Net credit impairments in relation to the opening balance of the year of debt securities, loans to the public and loans to credit institutions measured at amortised cost, financial guarantees and loan commitments, net of ECL allowances.

ECL coverage ratio

ECL allowances in relation to underlying gross carrying amounts for loans and debt securities as well as nominal amounts of financial guarantees and loan commitments.

Stage 3 loans / Total loans, gross

Gross carrying amount for stage 3 loans (credit-impaired loans) in relation to gross carrying amount for total loans measured at amortised cost (excluding demand deposits credit institutions and including trade and client receivables presented as other assets).

Stage 3 loans / Total loans, net

Carrying amount for stage 3 loans (credit-impaired loans) in relation to carrying amounts for total loans measured at amortised cost (excluding demand deposits credit institutions and including trade and client receivables presented as other assets).

Definitions**According to the EU Capital Requirements Regulation no 575/2013 (CRR)****Risk exposure amount**

Total assets and off balance sheet items, risk-weighted in accordance with capital adequacy regulations for credit risk and market risk. The operational risks are measured and added as risk exposure amount. Risk exposure amounts are only defined for the consolidated situation, excluding insurance entities and exposures deducted from own funds.

Common Equity Tier 1 capital

Shareholders' equity excluding proposed dividend, deferred tax assets, intangible assets and certain other regulatory adjustments defined in EU Regulation no 575/2013 (CRR).

Tier 1 capital

Common Equity Tier 1 capital plus qualifying forms of subordinated loans liabilities, so-called additional tier 1 instruments.

Tier 2 capital

Mainly subordinated loans liabilities not qualifying as Tier 1 capital contribution.

Own funds

The sum of Tier 1 and Tier 2 capital.

Common Equity Tier 1 capital ratio

Common Equity Tier 1 capital as a percentage of risk exposure amount.

Tier 1 capital ratio

Tier 1 capital as a percentage of risk exposure amount.

Total capital ratio

Total own funds as a percentage of risk exposure amount.

Leverage ratio

Tier 1 capital as a percentage of total assets including off balance sheet items with conversion factors according to the standardised approach.

Liquidity Coverage Ratio (LCR)

High-quality liquid assets in relation to the estimated net liquidity outflow over the next 30 calendar days.

The excel file Alternative Performance Measures, available on sebgroupp.com/ir, provides information on how the measures are calculated.

This is SEB

Our vision	To deliver world-class service to our customers.
Our purpose	We believe that entrepreneurial minds and innovative companies are key to creating a better world. We are here to enable them to achieve their aspirations and succeed through good times and bad.
Our overall ambition	To be the undisputed leading Nordic bank for corporations and institutions and the top universal bank in Sweden and the Baltic countries.
Whom we serve	2,300 large corporations, 700 financial institutions, 267,000 SME and 1.4 million private full-service customers bank with SEB.
Our strategic priorities	<p><i>Leading customer experience</i> – develop long-term relationships based on valuable advice, customers' trust in SEB as well as their appreciation of SEB's services.</p> <p><i>Resilience and flexibility</i> – maintain resilience and flexibility, based on capital and liquidity strength, to enable adaptation to prevailing market conditions.</p> <p><i>Growth in areas of strength</i> – focus on profitable organic growth in areas of strength.</p>
Business plan focus areas	<p><i>Advisory leadership</i> – Provide customers with proactive, customised and valuable advice, based on customer insight and data analysis, through human and digital interaction.</p> <p><i>Operational excellence</i> – Enhance customer value and increase process efficiency and speed by accelerating digitalisation and automation while extending the use of data.</p> <p><i>Extended presence</i> – Broaden the offering by supplying customers with external products and extend SEB's presence by providing products and services in customers' digital ecosystems.</p>
Values	Guided by our Code of Business Conduct and our core values: customers first, commitment, collaboration and simplicity.
People	Around 15,000 highly skilled employees serving customers from locations in some 20 countries; covering different time zones, securing reach and local market knowledge.
History	More than 160 years of business, trust and sharing knowledge. The bank has always acted responsibly in society promoting entrepreneurship, international outlook and long-term relationships.

Additional financial information is available in SEB's Fact Book which is published quarterly on sebgroupp.com/ir.
