<sup>1)</sup> Adjustments of the calculation method. The implementation of IFRS 15 has a positive impact of 1,990 (impairment of deferred acquisition costs)

<sup>2)</sup> Sales defined as new contracts and extra premiums on existing contracts.

<sup>3)</sup> The actual outcome of previously signed contracts can be compared with earlier assumptions and deviations can be calculated. The most important components consist of extensions of contracts as well as cancellations.

<sup>4)</sup> Restated as a result of the implementation of IFRS 15. Effect of restate: 19 20 -3 12

<sup>5)</sup> Acquisition costs are capitalised in the accounts and amortised according to plan. Certain front end fees are also recorded on the balance sheet and recognized as revenue in the income statement during several years. The reported change in surplus values is adjusted by the net effect of changes in deferred acquisition costs and deferred front end fees during the period.

<sup>6)</sup> Assumed investment return (growth in fund values) is 5.0 per cent gross before fees and taxes. Actual return results in positive or negative financial effects

<sup>7)</sup> The positive effect in Q4 2016 relates to several changes such as lapse rate, assumed expenses and mortality. In Q4 2017 the major positive effects are from changed assumptions of expenses, growth in funds and negative effects from the right to transfer policies.

<sup>8)</sup> The calculated surplus value is not included in the SEB Group's consolidated accounts. The closing balance is net of capitalised acquisition costs and deferred front end fees.

<sup>9)</sup> Capitalised internal acquisition costs relating to investment contracts are reversed (IFRS 15)

*\* Alternative Performance Measures, APMs, are financial measures of historical or future financial performance, financial position, or cash flows, other than those defined in the applicable financial reporting framework (IFRS) or in the EU Capital Requirements Regulation and Directive CRR/CRD IV. APMs are used by SEB when relevant to assess and describe the performance of SEB and provide additional relevant information and tools to enable a view on SEB's performance. APMs on basic earnings per share, diluted earnings per share, net worth per share, equity per share, return on equity, return on total assets and return on risk exposure amount provide relevant information on the performance in relation to different investment measurements. The cost/income ratio provides information on SEB's cost efficiency. APMs related to lending provide information on provisions in relation to credit risk. All these measures may not be comparable to similarly titled measures used by other companies.*
