# Corporate Governance

SEB follows the Swedish Code of Corporate Governance (Bolagsstyrningskoden).

The structure of responsibility distribution and governance comprises:

- Annual General Meeting (AGM)
- Board of Directors
- President and Chief Executive Officer (CEO)
- Divisions, business areas and business units
- Business Support and staff functions
- Internal Audit, Compliance and Group Risk organisation.

## Board

The Board members are appointed by the shareholders at the AGM for a one-year term of office, extending through the next AGM. The Board of Directors consists of eleven members without any deputies, elected by the AGM, and of two members and two deputies appointed by the employees.

In order for the Board to form a quorum more than half of the

members must be present. The President and CEO, Annika Falkengren, is the only Board member elected by the AGM who is equally an employee of the Bank. All other Board members elected by the AGM are considered to be independent in relation to the Bank and its Management. Two Board members are considered non-independent in relation to major shareholders.

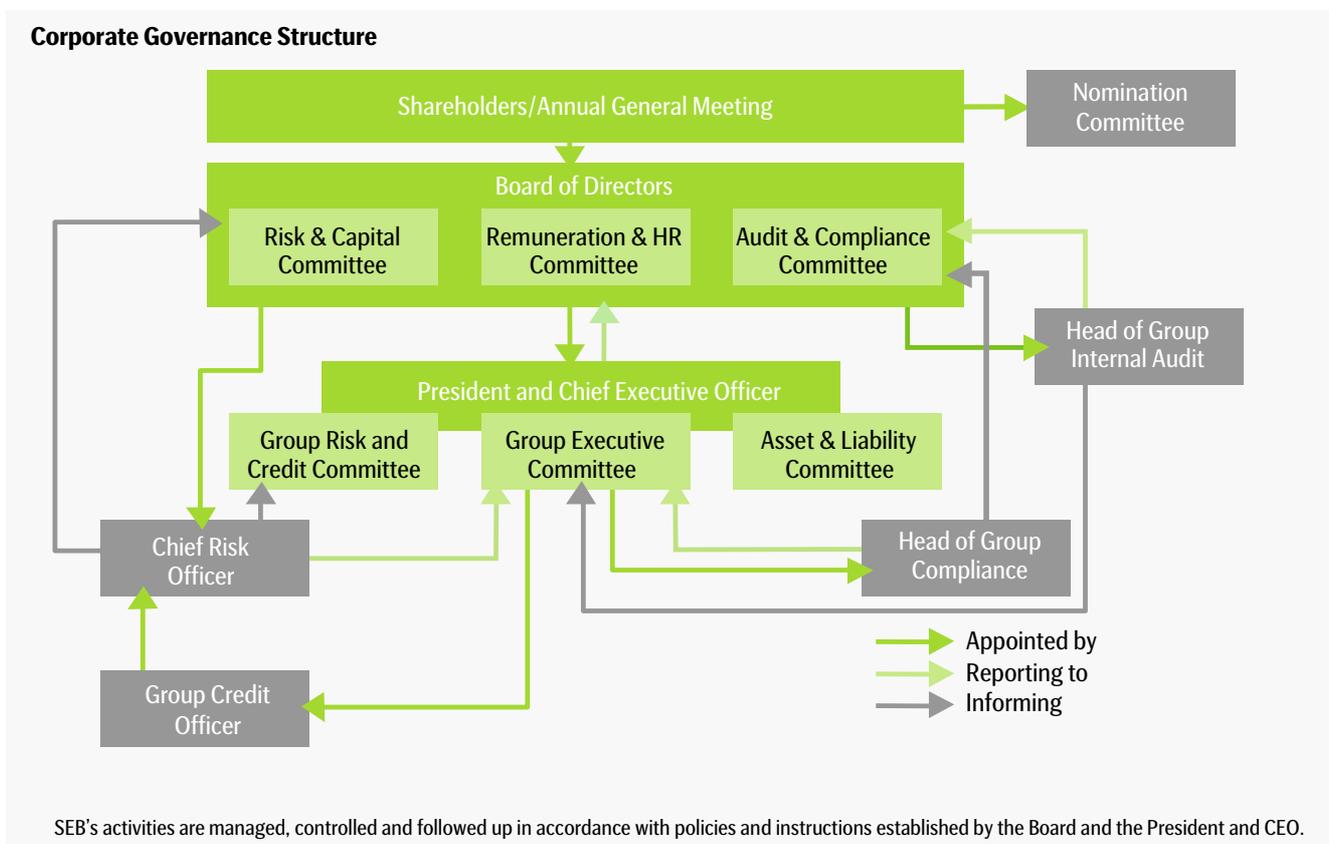

## Group Executive Committee

The President and CEO has three different committees at her disposal; the Group Executive Committee, the Group Risk and Credit Committee and the Asset and Liability Committee. The GEC deals with, among other things, matters of common concern to several divisions, strategic issues, business plans, financial forecasts and reports.

The Board of Directors and the President and CEO perform their governing and controlling roles through several policies and instructions, the purpose of which is to clearly define the distribution

of responsibility.

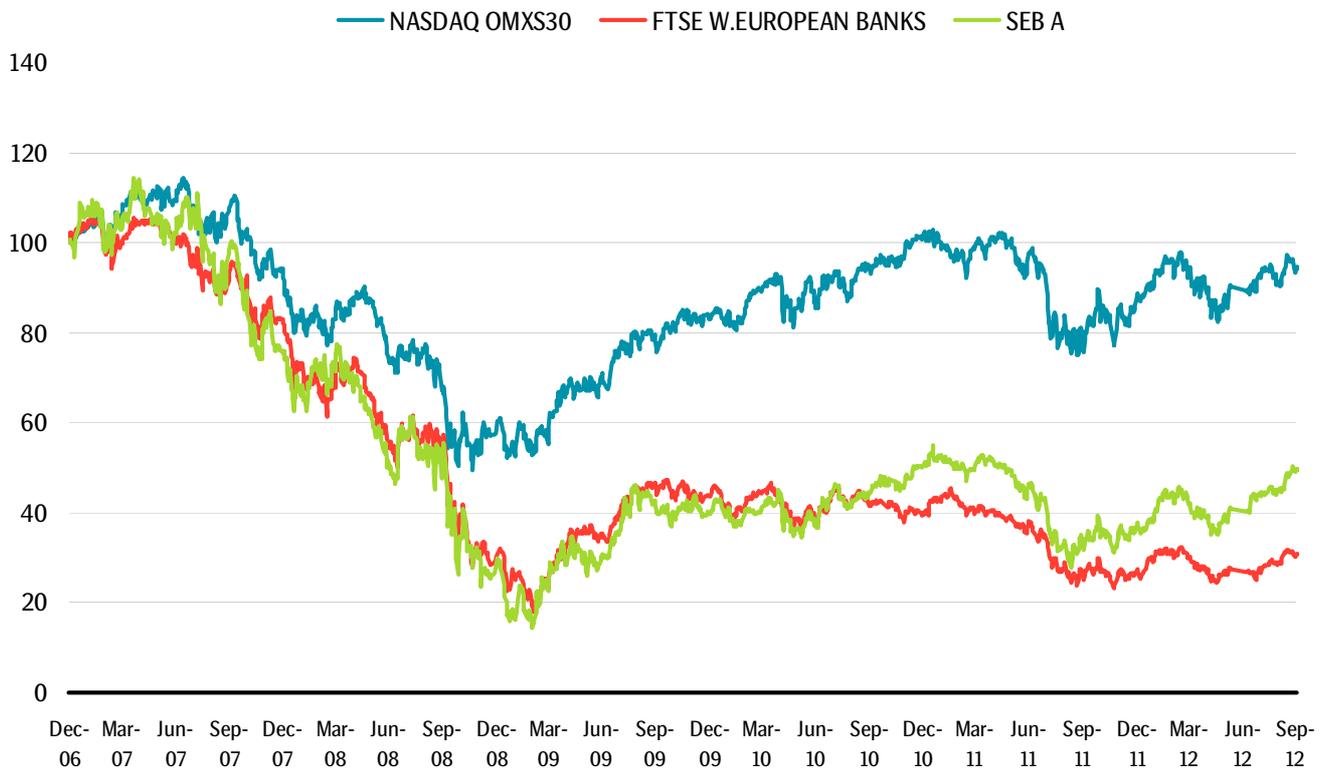

The Rules of Procedure for the Board of Directors, the Instruction for the President and Chief Executive Officer, the Instruction for the Activities, the Group's Credit Instruction, Instruction for handling of Conflicts of Interest, Ethics Policy, Risk Policy, Instruction for procedures against Money Laundering and Financing of Terrorism, Remuneration Policy, Code of Business Conduct and the Corporate Sustainability Policy are of special importance.

## Market risk

The Group's risk taking in trading operations is primarily measured by value at risk, VaR. The Group has chosen a level of 99 per cent probability and a ten-day time-horizon for reporting. In the day-to-day risk management of trading positions, SEB follows up limits with a one-day time horizon.

All risk exposures are well within the Board's decided limits and the

utilization remained low.

Market risk within Merchant Banking decreased during the summer months and remained stable for the rest of the quarter.

VaR within Treasury operations has decreased during Q3 mainly due to lower credit spread volatility.

The table below shows the VaR exposure by risk type.

Following the Basel III regulation for capital, liquidity and funding to be implemented in Sweden starting 2013, SEB has continued to align the framework for capital and liquidity management. In Q1 2012, SEK 16bn more capital has been allocated to the divisions from the central function. In addition, internal funds transfer prices more fully reflect the increased cost of funding and buffers of liquidity required going forward. Further refinements are likely during 2012.

### Gamla Livförsäkringsaktiebolaget

Traditional insurance business is operated in Gamla Livförsäkringsaktiebolaget SEB Trygg Liv (Gamla Liv). The entity is operated according to mutual principles and is not consolidated in SEB Trygg Liv's result. Gamla Liv is closed for new business since 1997. The policyholder organisation, Trygg Stiftelsen (the Trygg Foundation), has the purpose to secure policyholders' influence in Gamla Liv. The Trygg Foundation is entitled to:

- Appoint two board members of Gamla Liv and, jointly with SEB, appoint the Chairman of the Board, which consists of five members.
- Appoint the majority of members and the Chairman of the Finance Delegation, which is responsible for the asset management of Gamla Liv.

### Surplus values

Surplus values are the present values of future profits from existing insurance contracts. The calculation is made to better understand the value and profitability of long term insurance contracts. In the ordinary accounts the income from the contracts is reported throughout the duration of the contract but much of the expenses

arise at the point of sale. This causes a mismatch in time between income and expenses. The surplus value reporting is in accordance with international practice and reviewed annually by external actuaries. Surplus values are not consolidated in the SEB Group accounts.

<sup>1)</sup> Effects from adjustments of the calculation method. Q1 2012 is also related to the previously not included subsidiary SEB Life International. Q2-3 2011 is related to previously not included products in Denmark.

<sup>2)</sup> Sales defined as new contracts and extra premiums on existing contracts.

<sup>3)</sup> The reported actual outcome of contracts signed can be placed in relation to the operative assumptions that were made. Thus, the value of the deviations can be estimated. The most important components consist of extensions of contracts as well as cancellations. However, the actual income and administrative expenses are included in full in the operating result.

<sup>4)</sup> Acquisition costs are capitalised in the accounts and amortised according to plan. Certain front end fees are also recorded on the balance sheet and amortised in the income statement during several years. The reported change in surplus values is adjusted by the net effect of changes in deferred acquisition costs and deferred front end fees during the period.

<sup>5)</sup> Assumed investment return (growth in fund values) is 5.0 per cent gross before fees and taxes. Actual return results in positive or negative financial effects.

<sup>6)</sup> In 2012 lower assumed expenses and bonus rate in Denmark both had a positive effect but a higher assumed surrender rate for "Kapitalpension" policies in Sweden had a negative effect. In Q4 2011 a lowering of the discount rate had a positive effect of some SEK 800m but lower expected growth in fund values had a negative effect of some SEK 300m and higher frequency of surrenders, lapse and transfers had a negative effect of some SEK 700m.

<sup>7)</sup> The calculated surplus value is not included in the SEB Group's consolidated accounts. The closing balance is adjusted for capitalised acquisition costs and deferred front end fees.
