Request to SEB's Board of Directors for consideration at the SE Bank's Annual General Meeting on March 30, 2021

Dispositions of SE-banken's lending to fossil fuels and investment in the same

Despite promises to take responsibility for the climate, SE Bank lends a lot of capital to fossil fuels every year. For example, since the Paris Agreement was signed by the Swedish Government and the Riksdag during the period 2016-2020, SE-bank has lent one hundred and fifty billion kronor to fossil companies. (This is to be compared with Svenska Handelsbanken's lending for the same purpose during the same period: SEK 6 billion.)

SE-banken supports, among other things, drilling in the Arctic for oil, as well as the development of new coal power. (Source: "Fair Finance Guide" and "bank track".) The undersigned kindly asks the bank's board to explain their motives for the decisions behind the 2016-2020 lent one hundred and fifty billion for fossil fuels.

My claim to SEB's Board of Directors as a shareholder is:

- 1) That SE-banken immediately works for the exclusion of fossil companies as borrowers in SE-banken.
- 2) That SE-banken also excludes fossil fuels as investment objects.

I further demand that SE-banken's Board of Directors not be granted discharge from liability. With its policy for its lending to fossil fuels, the Board has during the period 2016-2020 actively counteracted the fulfillment of the Paris Agreement, and counteracted the Swedish Government's and the Riksdag's work for the implementation of this agreement.

Stockholm, February 7, 2021

Elisabeth Dahlerius Dahlin
